MOUAD ABBASSID

Casablanca, Morocco | +212 666 279 213 | abasside1234@gmail.com | github.com/Nyckboy

PROFESSIONAL SUMMARY

Engineering student and full-stack developer experienced in building role-based web applications with React, TypeScript, FastAPI, Spring Boot, PostgreSQL, Docker, and CI/CD. Hands-on across user interfaces, backend services, document processing, Linux/VPS deployments, and delivery automation.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Vite, Tailwind CSS, React Native

Backend: Python, FastAPI, Spring Boot, Java, Node.js, C, C++

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Infrastructure & Tools: Docker, Jenkins, GitHub Actions, Nginx, Linux, Git, GitHub

EXPERIENCE

Full-Stack Developer Intern | **Royal Air Maroc - Digital Factory** Jul 2026 - Sep 2026 | GitHub

- Built a role-based platform for administrators, supervisors, and interns to manage projects, tasks, progress, deliverables, comments, and notifications.
- Developed responsive user interfaces with React, TypeScript, Vite, and Tailwind CSS, backed by Spring Boot services.
- Implemented role-based access control, dashboards, project and task lifecycle workflows, notifications, and deliverable submissions.
- Supported CI/CD automation with Jenkins, including automated testing, dependency-security checks, and deployment controls.

Full-Stack Developer Intern | **IT Road** Jul 2025 - Sep 2025

- Created secure, scalable RESTful APIs using Spring Boot and modeled relational data in PostgreSQL.
- Built modern responsive interfaces with React, Vite, and TypeScript.
- Contributed to code reviews, unit testing, and Agile collaboration to support reliable feature delivery.

SELECTED PROJECTS

Polling List Search Platform | *FastAPI, PostgreSQL, React, TypeScript, Docker, Nginx*
Built a client platform that converts Arabic polling-list PDFs into normalized, searchable PostgreSQL records, with asynchronous imports, role-based access control, audit logs, and Arabic RTL search. Deployed it on an Ubuntu VPS with Docker, Nginx, HTTPS, and automated deployment configuration.

VPS Monitoring | *Python, Linux*
Deployed a virtual-server monitoring tool to track real-time infrastructure metrics and performance.

Charity Management Platform | *Spring Boot, Jenkins, Docker, Nginx* | GitHub
Designed backend architecture and an automated CI/CD pipeline for a charity-management application.

Real-Time Chat Application | *Node.js, Socket.io, SQLite* | GitHub
Built a network application with bidirectional synchronization and local state persistence.

EDUCATION

Engineering Degree in Computer Science (in progress) | EMSI, Casablanca | 2024 - 2027

Integrated Preparatory Cycle | EMSI, Casablanca | 2022 - 2024

High School Diploma, Physical Sciences | Ecole Barrada, Casablanca | 2018 - 2019

CERTIFICATIONS & LANGUAGES

Certifications: Coursera - Unix, C++, React Native, JavaScript

Languages: Arabic (Native), English (Professional), French
